SUMMARY

Full-stack developer and AI engineer skilled in the MERN stack, Django/DRF, Machine Learning, NLP, and agentic AI systems (LangChain/LangGraph). Hands-on experience building web applications, payment modules, ML-based solutions, and multi-agent LLM workflows with strong API development, debugging, and data-handling skills.

INTERNSHIP EXPERIENCE

- ❖ **Marketing Maharaja | Research & Development Intern** Remote | Mar 2026 – Present
 - Built and maintained REST APIs using Django and Django REST Framework to support core product features; implemented Redis-backed caching to cut database load and improve response times.
 - Set up Celery task queues for asynchronous background jobs (notifications, data exports) and collaborated with design/marketing teams to translate research requirements into backend functionality.
- ❖ **Aquad Software Solutions Pvt. Ltd. | Web Development Intern** Remote | Jul 2025 – Aug 2025
 - Created and maintained project documentation; uploaded, validated, and structured educational content on the ExamPrepTool platform; performed bug/UI-UX testing with clear reproduction reports for the dev team.
- ❖ **NIT Delhi | NLP Research Intern** New Delhi | Jun 2024 – Jul 2024
 - Benchmarked five text-vectorization techniques (BoW, TF-IDF, GloVe, Word2Vec, FastText) and trained/optimized Decision Tree, Logistic Regression, Naive Bayes, SVM, and Random Forest classifiers for sentiment analysis; awarded Certificate of Excellence and Letter of Recommendation.
- ❖ **Codsoft | Web Developer Intern** Virtual | Sep 2023 – Oct 2023
 - Developed responsive web applications using HTML, CSS, and JavaScript, including form validation, animations, and dynamic content rendering.

PROJECTS

- ❖ **Text-to-SQL & Research-and-Report Agent** LangChain, LangGraph, Guardrails AI, LangSmith
 - Designed a production-grade LangGraph agent with one shared state graph handling two paths: natural-language-to-SQL retrieval (list_tables → get_schema → generate_sql → validate_sql → execute_sql with bounded retries) and a research-and-report path that synthesizes findings into attributed, audience-specific reports.
 - Implemented dual-pass guardrails (entry + output) for prompt-injection, disguised destructive-intent, PII, and unsupported-claim screening, plus human-in-the-loop interrupts on restricted-table queries and external report sends, phased across a 5-stage delivery plan with eval harnesses and go/no-go gates.
- ❖ **Visionary - AI Braille Engine** TensorFlow, Keras, OpenCV, Python, Streamlit, Gemini API
 - Built a hybrid computer vision system and translator bridging tactile Braille and digital text, integrating a custom 5-block CNN with Squeeze-and-Excitation attention and Hough Circle detection for accurate dot-pattern OCR.
 - Engineered real-time webcam text capture with Gemini API-powered OCR auto-correction, an agentic document assistant for interactive chat, and Hindi Bharati Braille translation.
- ❖ **Supply Chain Disruption Agent** FastAPI, React, LangGraph, WebSockets, APScheduler, SQLite/PostgreSQL
 - Architected a full-stack disruption-monitoring system on 100k+ Olist orders where an APScheduler worker runs live SQL scans to flag carrier/seller delays, feeding a LangGraph state machine (Monitor → Classifier → Resolver → Report) that auto-resolves low-risk cases and escalates critical ones.
 - Implemented true state checkpointing with LangGraph's SqliteSaver to pause execution on high-severity interrupts and resume from saved thread state on operator approval, while streaming node transitions and logs to a React dashboard in real time over WebSockets.
- ❖ **Flourish** Python, Django, DRF, PostgreSQL, Redis, Celery, JWT
 - Engineered a modular Django backend using the Service-Selector (Fat Services, Thin Views) pattern; designed 18+ secure REST API endpoints with a unified response formatter and centralized exception handling.
 - Built a time-decay scoring engine and composite behavioral risk engine (focus, consistency, social, mental health) triggering real-time high-risk flags via a Pub/Sub EventDispatcher; configured a Celery-Redis async pipeline with multi-tenant, RBAC-secured data isolation.
- ❖ **CampusConnect CS** MERN Stack
 - Integrated a secure Razorpay payment gateway using React.js, Node.js, Express.js, and MongoDB; built APIs for order creation, payment verification, and webhook handling for a smooth online payment flow.
- ❖ **Stock Market Price Prediction Model** Python, Machine Learning, Deep Learning
 - Developed a model predicting stock prices for TCS, Wipro, and Adani Ports using Logistic Regression, Random Forest, and LSTM, with feature engineering and model evaluation to improve prediction accuracy.
- ❖ **Sentiment Analysis using NLP** Python, NLP, Machine Learning
 - Built a sentiment analysis model using NLP and ML techniques (text vectorization and classification) achieving high accuracy and efficiency.

EDUCATION

❖ Apeejay Stya University — Gurugram, Haryana	2022 – 2026
B.Tech, Computer Science & Engineering — SGPA: 4.11 / 4.3	
❖ R.J.L Public School — Palwal, Haryana	2021 – 2022
12th (CBSE) — 91%	
❖ R.J.L Public School — Palwal, Haryana	2019 – 2020
10th (CBSE) — 94%	

TECHNICAL SKILLS

- **Languages:** Python (Intermediate), JavaScript (Intermediate), SQL (Intermediate), HTML/CSS
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Flask, Django, Django REST Framework, Celery, TensorFlow/Keras, OpenCV
- **AI / ML:** Machine Learning, Deep Learning, NLP, CNNs, LSTM, Retrieval-Augmented Generation, LLMs, LangChain, LangGraph
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, SQL
- **Tools:** Git, GitHub, Postman, Flask, ngrok, VS Code, Antigravity, Guardrails AI, LangSmith

CERTIFICATIONS

- Certificate of Completion — Marketing Maharaja (Research & Development Internship)
- Certificate of Completion — Aquad Software Solutions Pvt. Ltd. (Web Development)
- Certificate of Excellence & Letter of Recommendation — NIT Delhi (NLP Internship)
- Certificate of Training — PynetLabs (Data Science & AI)
- Certificate of Completion — IBM (Generative AI: Prompt Engineering Basics)
- Oracle Course Completion Certificate — SQL
- Certificate of Completion — Codsoft (Web Developer Internship)
